

This week at St Margaret's Nursery

Week beginning: 10th September 2018

1

All About Maths

For maths week the children have been involved in a wide variety of activities to support and develop their awareness of numbers: we have continued to involve our apples in sorting and weighing activities, found number counting and matching games on the computer and used the dice to help us find letters.

The nursery and junior department made a human graph in the playground to record how many people had their birthdays in each month.

We have been practising our number awareness, formation, counting and sequencing.

These activities encourage problem solving and perseverance skills as well as developing language skills and interactions.

We were able to arrange the bears in order of size and talk about the differences between them.

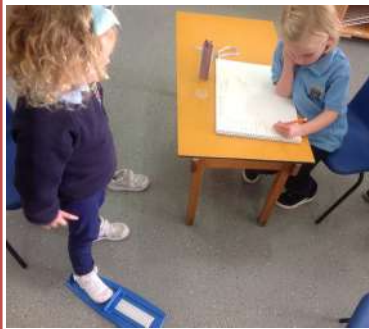

All About Me - Faces, Fingers and Feet

We have been using different types of media to create faces.

We can use finger painting to help us count.

We have been having fun with our feet: measuring them, drawing around them and painting them.

Anything else?

The children have been developing their fine motor skills by using spray bottles. If you have any spare, clean spray bottles at home, we are looking to develop what we have and take the activity outside.

We would like to thank everyone who came to our information evening last week and we hope you found it informative and useful.

We appreciate the feedback that we have already received and for anyone who still wishes to add any comments we have placed the sheets in the nursery corridor.

We have been delighted with the children's perseverance and teamwork this week. We encourage the children to persevere with a whole variety of activities throughout the nursery day to develop their independence skills and sense of achievement. Often we find that the end product is not necessarily what is important.

What will we be learning about next week?
Friendship and teamwork, All About Me
